

Airbnb Listings Bangkok Data Dictionary

Feature	Description
id	Airbnb's unique identifier for the listing.
name	Name of the listing.
host_id	Airbnb's unique identifier for the host/user.
host_name	Name of the host. Usually, just the first name(s).
neighborhood	The neighborhood is geocoded using the latitude and longitude against neighborhoods as defined by open or public digital shapefiles.
latitude	Uses the World Geodetic System (WGS84) projection for latitude and longitude.
longitude	Uses the World Geodetic System (WGS84) projection for latitude and longitude.
room_type	<p>[Entire home/apt Private room Shared room Hotel]</p> <p>All homes are grouped into the following three room types:</p> <p>Entire place Entire places are best if you're seeking a home away from home. With an entire place, you'll have the whole space to yourself. This usually includes a bedroom, a bathroom, a kitchen, and a separate, dedicated entrance. Hosts should note in the description if they'll be on the property or not (ex: "Host occupies the first floor of the home") and provide further details on the listing.</p> <p>Private rooms Private rooms are great for when you prefer a little privacy, and still value a local connection. When you book a private room, you'll have your private room for sleeping and may share some spaces with others. You might need to walk through indoor spaces that another host or guest may occupy to get to your room.</p> <p>Shared rooms Shared rooms are for when you don't mind sharing a space with others. When you book a shared room, you'll be sleeping in a space that is shared with others and share the entire space with other people. Shared rooms are popular among flexible travelers looking for new friends and budget-friendly</p>

	stays.
price	Daily price in local currency. Note, the \$ sign may be used despite the locale.
minimum_nights	The minimum number of night stays for the listing (calendar rules may differ).
